

MIA CAGANN

mcagann80@gmail.com | (630)-478-3402 | Bartlett, IL 60103

Summary

Skilled in navigating complex technical environments with a solid background as a Computer User Support Specialist. Possess strong troubleshooting capabilities and adept at providing solutions to enhance system functionality and user satisfaction. Demonstrated ability to communicate effectively with users, ensuring understanding and proper use of software and hardware. Improved help desk response times and user experience through proactive support and training initiatives.

Skills

- Customer Engagement
- Songwriting & Music Production
- Team Collaboration & Leadership
- Time & Schedule Management
- Public Speaking
- Problem Solving
- Verbal Communication
- Proficient in Excel
- Network troubleshooting
- Customer service
- IT support services
- IT Consultation
- IT problem-solving
- IT ticket documentation
- Engineering design
- CAD

Experience

Best Buy, Geek Squad | Schaumburg, Illinois

Consultation Agent

05/2026 - Current

- Delivered level 2 hardware and OS support across multiple platforms.
- Executed component replacements, malware removal, and system recovery for client devices.
- Re-imaged and configured client workstations utilizing standard deployment workflows.
- Managed ticket queues by documenting issue resolutions while maintaining SLA compliance.
- Performed on-site network support, troubleshooting local connectivity, and assisting in OS support.
- Tracked KPIs and service metrics in order to improve my daily performance.

Hybrid Music Label | Chicago, IL

Singer Songwriter

07/2024 - Current

- Managed the distribution of music through online platforms such as iTunes and Spotify.
- Expressed musical themes through tempo, phrasing and dynamics.
- Wrote, recorded, and released original music aligned with label branding and audience insights.
- Promoted songs across social media, growing listener base organically through video trends.
- Collaborated with producers on sound design and mixing, maintaining creative vision and quality.
- Negotiated session contracts, gaining business exposure in music licensing and streaming platforms.

- | | |
|--|--|
| Chicago Bruins, Team Illinois Woodridge, IL
Hockey Player/Captain
03/2018 - 03/2024 | <ul style="list-style-type: none"> • Led team as captain, coordinating communication between coaches and players. • Demonstrated discipline and sportsmanship, balancing rigorous practice with academic commitments. • Provided peer mentorship and support, contributing to team morale and development. |
| Anderson Humane Animal Shelter South Elgin
Animal Shelter Volunteer
05/2022 - 07/2023 | <ul style="list-style-type: none"> • Provided care for animals by feeding, cleaning cages, walking dogs, and providing companionship. • Maintained animal shelter by cleaning and disinfecting kennels, cages and equipment, washing dishes and laundry, taking out garbage and performing custodial duties. • Walked animals in assigned area to complete daily enrichment. • Observed shelter animals for unusual symptoms indicative of medical or behavioral problems, reporting issues to shelter manager. • Worked to rehabilitate injured or sick wildlife in order to help them properly adjust back to living in the wild. |

Projects

Virtual Window - Prototyping | Independent Engineering Project, August 2026-Present

CAD, Display Hardware, Electronics, Thermal Design, Fabrication

- Repurposing a disassembled 43 inch 4K television panel into a custom wall-mounted digital window in a custom built enclosure.
- Modeled and designed around display-panel dimensions, mounting constraints, ventilation, and thermal management.
- Integrating a designated mini PC and push button controls to create an autonomous digital display system.

O.W.L.S - Optical Weather Live-Visualization Station | Independent Engineering Project, September 2026 - Present

Raspberry Pi, Python, Optical Design, Electronics, CAD

- Designing a desktop optical system using concealed LCD and beamsplitter geometry to create a hologram-like real-time weather visualization.
- Selected and integrated computing, display, optical, and power components for a Raspberry Pi based prototype.
- Developing a procedural visualization system to translate live meteorological data into animated cloud, precipitation, and atmospheric effects.
- Integrating meteorological API systems into the device to ensure accurate, real-time data.

Education and Training

Michigan State University | East Lansing, MI

Bachelor of Science in Technology Engineering

Expected in 04/2028

Saint Viator High School | Arlington Heights, IL

High School Diploma

05/2024

- Sem 1, 2020 - Honor Roll
- Sem 2, 2020 - Honor Roll
- Computer Science AP Course
